Premium specification.

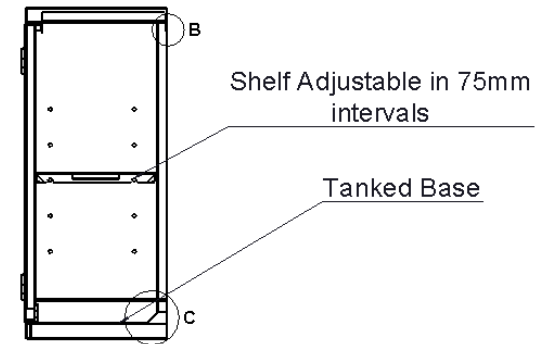

Inset Handles

Standard and lite specification.

DETAIL C
SCALE 1 : 2

SECTION A-A
SCALE 1 : 10

The joint between base and sides means no raw edges are on show. The rear of the base shelf will be chamfered, providing easier cleaning and maintenance.

All wall cupboards will have a single piece wrap over the sides and top. This allows us to remove any join lines and raw edges.

Looking at the image you can see the wrap highlighted in green.
